THE PROBLEM

Many channels, many countries, many tax rates – and hours of manual work at the end of every month.

Without AccountOne

- ✕ Downloading reports from every marketplace and store one by one
- ✕ Matching payouts and fees to orders by hand
- ✕ Checking tax rates and delivery countries yourself
- ✕ Answering your tax firm's queries and supplying missing data

With AccountOne

- ✓ Orders and payments arrive automatically via API
- ✓ Open item matching is done before the export
- ✓ The VAT matrix assesses every sale across Europe
- ✓ Your tax firm receives a DATEV export without rework

SALES TO OTHER EU COUNTRIES

VAT in EU distance selling assessed automatically

If you sell to private customers in other EU countries and exceed €10,000 a year, the VAT of the destination country is usually due. The AccountOne VAT matrix assesses every sale by delivery country and tax rate.

- ✓ **OSS-capable:** The data fits the One-Stop-Shop procedure, which lets you report foreign VAT collectively through the German Federal Central Tax Office.
- ✓ **Different tax rates in one order:** Orders containing items at different tax rates are split line by line.
- ✓ **Retroactive before OSS, too:** For periods before 1 July 2021, the delivery thresholds of the individual countries apply. AccountOne takes them into account when you have to work through earlier years.
- ✓ **VAT data for foreign registrations:** If you are registered for tax in other countries, the data is ready for your returns.

WHY ACCOUNTONE

Software that calculates. People who help.

Fits your accounting

- ✓ 4- to 12-digit & alphanumeric accounts
- ✓ Minimally invasive in your existing tech stack
- ✓ SaaS in the browser, always up to date

Special cases covered too

- ✓ Integrated VAT compliance for foreign taxes

Multichannel · Dropshipping · OSS · EFN & Pan-EU · Margin scheme · Sales in Europe, USA & Far East

Personal & independent

- ✓ Phone support from our specialists
- ✓ We communicate with your tax consultant
- ✓ 100% investor-free, owner-managed from Flensburg

E-commerce accounting for every business model

Whether you are an Amazon seller, run your own Shopify store or sell across several channels and ship throughout the EU: every business model places its own demands on accounting.

MARKETPLACES

Automate Amazon accounting and other marketplaces

Whether Amazon, eBay, Kaufland, Etsy or Mirakl marketplaces such as Shop Apotheke and MediaMarkt/Saturn: every marketplace delivers sales, fees, commissions, refunds and payouts in its own format. AccountOne retrieves this data via integration, assesses every order for tax purposes and matches the payouts automatically.

OWN STORE

Accounting for your own online store

In your own store, ordering and payment run through separate systems: the order comes from Shopify, Shopware, WooCommerce, Magento or JTL, the money through PayPal, Klarna, Mollie or Stripe. AccountOne collects both and brings them together automatically.

SPECIAL CASES

Accounting for business models beyond the standard

If PAN-EU, complex ERP landscapes or unusual tax constellations are part of your daily business, we go straight into your setup in the 1:1 expert check.

Is my system included?

Over 40 systems – the number of integrations you use is not limited in the price.

amazon · eBay · OTTO · Global Marketplace · zalando · Etsy · TEMU · shopify

shopware · WOOCOMMERCE · JTL · PayPal · Klarna. · stripe · mollie · + 27 more

Compatible accounting systems: DATEV · Agenda · BMD · edrewe · Simba

★★★★★

Customer service that is second to none

"What impresses us most is the combination of powerful software that simply works and customer service that is second to none. ... All sales and payment data is assigned centrally and prepared in a DATEV-compliant way."

Ramiz, CEO, BG E-Commerce GmbH · OMR Reviews

★★★★★

Take an enormous amount of work off our hands

"Especially in e-commerce, clean and tax-compliant processing of marketplace data is not a 'nice-to-have' but business-critical. ... [They] take an enormous amount of work off our hands and above all provide certainty."

Björn, Managing director, B+B Computer Trading GmbH · Google
