ACCOUNTONE

FOR TAX CONSULTANTS

All e-commerce clients. One platform.

AccountOne automatically processes the sales and payment data of your online retail clients – including VAT assessment across Europe – and transfers it directly to any accounting system with a DATEV connection.

- ✓ **Permanently free of charge for tax firms**
- ✓ **Sample account assignments for common charts of accounts**
- ✓ **All clients in one account**
- ✓ **Personal expert support**

THE PROBLEM

E-commerce clients tie up time: many channels, many tax countries, many payment flows – different for every client.

Without AccountOne

- ✕ Every client delivers reports in a different format
- ✕ Reconciling payouts on clearing accounts by hand
- ✕ Checking tax rates and delivery countries yourself
- ✕ Finding a separate solution for every new channel

With AccountOne

- ✓ All channels come together in one platform
- ✓ Payments are matched to revenue before the export
- ✓ The VAT matrix assesses every sale across Europe
- ✓ New channels can be connected at no extra charge

DATEV EXPORT

A booking batch you can review as a tax consultant

Every month, AccountOne provides a booking batch per client as a CSV file in DATEV format. It is suitable for batch processing and is regularly checked with the DATEV validation tools.

- ✓ **Import via batch processing:** You import the batch straight into DATEV, without the detour via the ASCII import.
- ✓ **Your chart of accounts:** The export adapts to your chart of accounts, 4 to 12 digits and alphanumeric.
- ✓ **DATEV Buchungsdatenservice:** Alternatively, you hand the entries over through it as soon as the period is locked in AccountOne.
- ✓ **Not just DATEV:** The batch can be imported into any system with a DATEV interface, such as Agenda, BMD, edrewe or Simba.

WHY ACCOUNTONE

Software that calculates. People who help.

Fits your firm

- ✓ 100% DATEV-compatible, batch-processable
- ✓ Export adapts to your chart of accounts – 4 to 12 digits, alphanumeric
- ✓ Minimally invasive in your existing tech stack
- ✓ SaaS in the browser, always up to date

Your clients' special cases covered too

- ✓ Integrated VAT compliance for foreign taxes

Multichannel · Dropshipping · OSS · EFN & Pan-EU · Margin scheme · Sales in Europe, USA & Far East

Personal & independent

- ✓ Phone support from our specialists
- ✓ Be found by online retailers in the PartnerNet
- ✓ 100% investor-free, owner-managed from Flensburg

What AccountOne does for tax consultants and firms

Online retailers are among the most demanding clients in financial accounting: many channels, payout reports with fees and commissions, sales into several EU countries.

VAT

Every sale assessed for VAT

AccountOne's own VAT matrix assigns every sale to the correct tax rate and tax country, even without an inventory management system. For tax consultants that means you review results instead of working out countries of delivery and tax rates yourself.

CLIENTS AND TEAM

All e-commerce clients in one account

With the free multi-client account, you manage all connected online retailers in one place. Your client connects the channels.

SPECIAL CASES

For e-commerce clients beyond the standard, too

Alongside the typical structures of online retail, AccountOne covers many special tax cases. If something does not fit yet, we develop the solution together with your firm.

Which systems do your clients use?

Over 40 systems, and the number of integrations is not limited in the price. If a system is missing, please contact our support team and we will look at your case individually.

amazon · eBay · OTTO · Global Marketplace · zalando · Etsy · TEMU · shopify

shopware · WOO COMMERCE · JTL · PayPal · Klarna. · stripe · mollie · + 27 more

Compatible accounting systems: DATEV · Agenda · BMD · edrewe · Simba

★★★★★

Game changer in e-commerce

"This saves us an enormous amount of time in financial accounting and at the same time significantly reduces sources of error. ... For us as a firm, another big plus is that we can map and scale even complex client structures efficiently."

Felix, Tax consultant and partner, SKULD · OMR Reviews

★★★★★

A clear recommendation for every tax consultant

"For our firm, AccountOne is a real game changer in looking after e-commerce clients. ... A clear recommendation for every tax consultant with online retail clients!"

Asim, Tax specialist / accounting, Baumann und Baumann · OMR Reviews
